Summary

Fresher Full Stack Developer with hands-on experience building production-ready MERN stack applications. Built The Pizza Hub — a live food ordering platform with real Razorpay payments, Google OAuth, JWT auth, and Redis caching — for an actual business client. Also developed MoodTunes, a face-expression-based music recommender using MediaPipe AI in the browser. Comfortable working across the full stack: React frontend to Node.js/Express backend with MongoDB and cloud integrations.

Technical Skills

Front-End: React.js, Vite, JavaScript ES6+, Tailwind CSS, SCSS/SASS, HTML5, CSS3

Back-End: Node.js, Express.js, MongoDB, Mongoose, REST APIs, EJS

Tools and Cloud: Git, GitHub, Postman, Vercel, ImageKit CDN, Redis (ioredis), Multer

Auth Payments: Razorpay Live Mode, JWT, bcrypt, Google OAuth 2.0, Passport.js, Nodemailer

Project

Full Stack Food Ordering App

web-shop-frontend.vercel.app

End-to-end food ordering web application built for a real local business client. Processes live payments via Razorpay and includes complete user authentication, email verification, and cloud media storage.

- Razorpay in live mode — real UPI and card payments accepted
- Google OAuth 2.0 login + JWT with HTTP-only cookie sessions
- Email verification on registration using Nodemailer
- ImageKit CDN for image storage · Redis (ioredis) for server-side caching
- Version control and collaboration handled via Git and GitHub.

[React] | [Vite] | [Tailwind CSS] | [Node.js] | [Express] | [MongoDB] | [JWT]
[Google OAuth] | [Razorpay] | [ImageKit] | [Nodemailer]

Face Expression Music Recommender

Detects user's facial expression in real-time via webcam using MediaPipe AI and recommends songs based on detected mood — happy, sad, or normal.

- Real-time face detection in browser using @mediapipe/tasks-vision
- MP3 upload with automatic ID3 tag + cover art extraction (node-id3)
- Song and poster files stored on ImageKit CDN · Redis caching layer
- JWT auth with bcrypt password hashing

[React] | [Vite] | [MediaPipe] | [Node.js] | [Express] | [MongoDB] | [JWT] | [ImageKit] | [Redis]

Education

Full Stack Web Development (Ongoing) Sheryians Coding School (Online)

- Learning MERN Stack (MongoDB, Express, React, Node.js) through project-based learning.
- Focused on React, JavaScript, and modern frontend development practices.

Stack Web Development (Ongoing) Attitude Academy (Offline, Delhi)

- Building strong foundations in HTML5, CSS3, JavaScript, and responsive design.
- Gaining practical exposure through hands-on assignments and real-world projects.
